EXPERIENCE

UI/UX Designer

VIPTutors **November 2025 - January 2026, London, United Kingdom**

- Pioneered the overhaul of the design system by building a scalable Figma component library, boosting design-dev efficiency by 40%, reducing debt, and unifying UI across product teams.
- Collaborated with developers during the handoff process by providing annotated designs and assets, ensuring pixel-perfect implementation.
- Owned the end-to-end visual design for 50+ responsive web pages and 20+ marketing campaigns, increasing conversion rates by 18% while ensuring pixel-perfect execution and 100% brand consistency across all platforms.

Software Engineer (Front-End & UI/UX)

AVICentral **July 2025 - September 2025, South Dakota, US**

- Designed and implemented responsive, accessible front-end interfaces for a CRM system using React.js, TypeScript, and Tailwind CSS, improving cross-platform performance and reducing browser-related issues by 30%.
- Collaborated with product managers and stakeholders to translate CRM business requirements into intuitive UI/UX workflows, boosting user engagement by 25% and reducing task completion time by 15%.
- Conducted user research, wireframing, and prototyping in Figma, then developed pixel-perfect CRM interfaces aligned with brand guidelines, resulting in a 20% increase in customer satisfaction scores.

Front End Web Developer (Internship)

Department of Trade and Industry **February 2025 - May 2025, Legazpi City, Philippines**

- Streamlined project workflows through cross-functional collaboration, reducing project completion time by 50% and facilitating the on-schedule launch of web development initiatives.
- Led the development of a full-stack document tracking system using Vue.js, Node.js, Tailwind, and PocketBase, centralizing document processes to achieve a 95% reduction in decentralized data points.
- Streamlined document process tracking, which improved overall clarity and operational efficiency by 90%.

PROJECT

Price Monitoring and Consumer Access Portal

Department of Trade and Industry

- Engineered a secure and responsive web portal for efficient input, maintenance, and display of price records, enhancing data accessibility for both internal operations and external consumers by 70%.
- Developed robust frontend and backend solutions that streamlined data management processes, reducing manual data handling time by 40%.
- Ensured consistent, up-to-date pricing information and improved overall transparency for end-users through comprehensive data management, resulting in a 98% accuracy rate for pricing data.

Document Tracking System

Department of Trade and Industry

- Developed and deployed a full-stack web application for logging and real-time monitoring of critical document processes, improving overall workflow efficiency by 60% and significantly reducing human errors.
- Designed intuitive user interfaces and backend logic that streamlined document submission, tracking, and approval.
- Achieved faster turnaround times for document processes by 30% and enhanced inter-departmental collaboration by 25%.

EDUCATION

Bachelor of Science in Information Systems

STI College Legazpi

Science Technology Engineering and Mathematics

Binangonan Catholic College

CERTIFICATIONS

Java Foundations

Oracle Academy • 2022

Systems Administration

Linux Professional Institute • 2022

TECHNICAL SKILLS

Frontend Development

- Proficient in modern frameworks and libraries including React.js and Vue.js
- Strong command of TypeScript, JavaScript, HTML, and CSS frameworks like Tailwind CSS and Bootstrap 5
- Experienced in building responsive, accessible, and cross-browser compatible interfaces
- Focus on performance optimization and reducing browser-related issues

UI/UX Design

- Advanced use of Figma for design systems, wireframing, and prototyping
- Built and maintained scalable component libraries
- Strong understanding of user-centered design, usability, and visual consistency
- Experience delivering pixel-perfect designs and improving conversion rates and engagement

Full-Stack Development

- Backend development with Node.js, .NET, and databases like MySQL and PocketBase
- Built full-stack systems such as document tracking platforms and data portals
- Experience designing secure, data-driven applications with high accuracy and efficiency

Collaboration & Workflow

- Skilled in cross-functional collaboration with designers, developers, and stakeholders
- Strong experience in design-to-development handoff processes
- Uses Git/GitHub for version control and Vercel for deployment
- Familiar with agile workflows and rapid iteration cycles

Data & System Optimization

- Improved system efficiency, reduced manual processes, and increased data accuracy across projects
- Experience designing systems that enhance data accessibility, transparency, and operational performance

Other Tools

- Proficient with Canva and Microsoft Office 365
- Comfortable working across both design and development environments
